4.2.3	Assign users to the course .....	7
4.2.4	E-mail invitation .....	8

## 1 Introduction

The Mass Subscription adds a new subtab to the members view of a course. There you can enter a list of e-mail addresses or matriculation-numbers that are separated in any way (spaces, commata, new lines, etc) allowing you to quickly invite many users from e.g. an excel table to a ILIAS course.

## 2 Feature Overview

### PL-Version Changes

1.0.0	- Insert a list of E-Mailaddresses and find existing accounts or send invitations to non-existing
2.0.0	- Use Matriculation Numbers for User-Mapping - New User-Interface - New Subscription Links when using E-Mails
2.3.0	- Deactivate the Plugin in Subtrees - Use Subscription in Groups

## 3 Installation

ILIAS 4.4 does not include ActiveRecord. Therefore please install the latest Version of ActiveRecord before you install the plugin:

Start at your ILIAS root directory

```
mkdir -p Customizing/global/plugins/Libraries/
cd Customizing/global/plugins/Libraries
git clone https://github.com/studer-raimann/ActiveRecord.git
```

### 3.1 Install Router

The Subscription-Plugin needs a Router-Service to work. Please install the Service first:

You start in your ILIAS root directory

```
cd Services
git clone https://github.com/studer-raimann/RouterService.git Router
```

Switch to the setup-Menu of your Installation and perform a Structure-reload in the Tab Tools. this can take a few moments. After the reload has been performed, you can install the plugin.

### 3.2 Install Plugin

Start at your ILIAS root directory

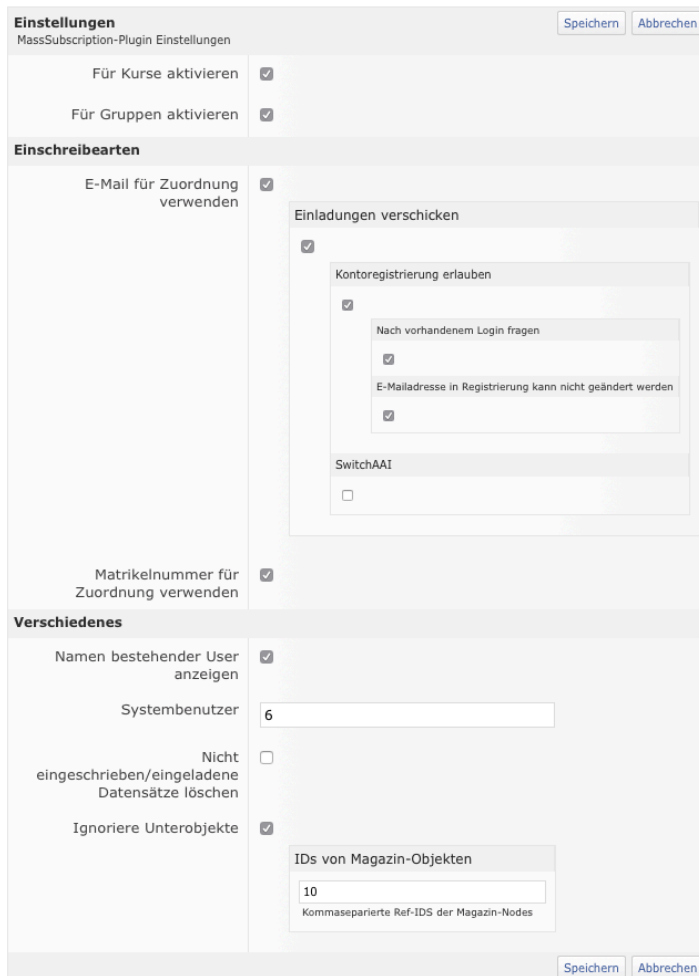

```
mkdir -p Customizing/global/plugins/Services/UIComponent/UserInterfaceHook/
cd Customizing/global/plugins/Services/UIComponent/UserInterfaceHook/
git clone https://github.com/studer-raimann/Subscription.git
```

As ILIAS administrator go to "Administration->Plugins" and install/activate the plugin.

## 4 Usage of the Plugin

### 4.1 Configure Plugin

As ILIAS administrator go to "Administration->Plugins" and click 'Configure' in the Subscription-Action-menu.

Configure you Plugin for your needs.

The Subscription-Plugin can be activated for courses and groups. You can use E-Mailaddresses and/or Matriculation-Numbers for User-Searches.

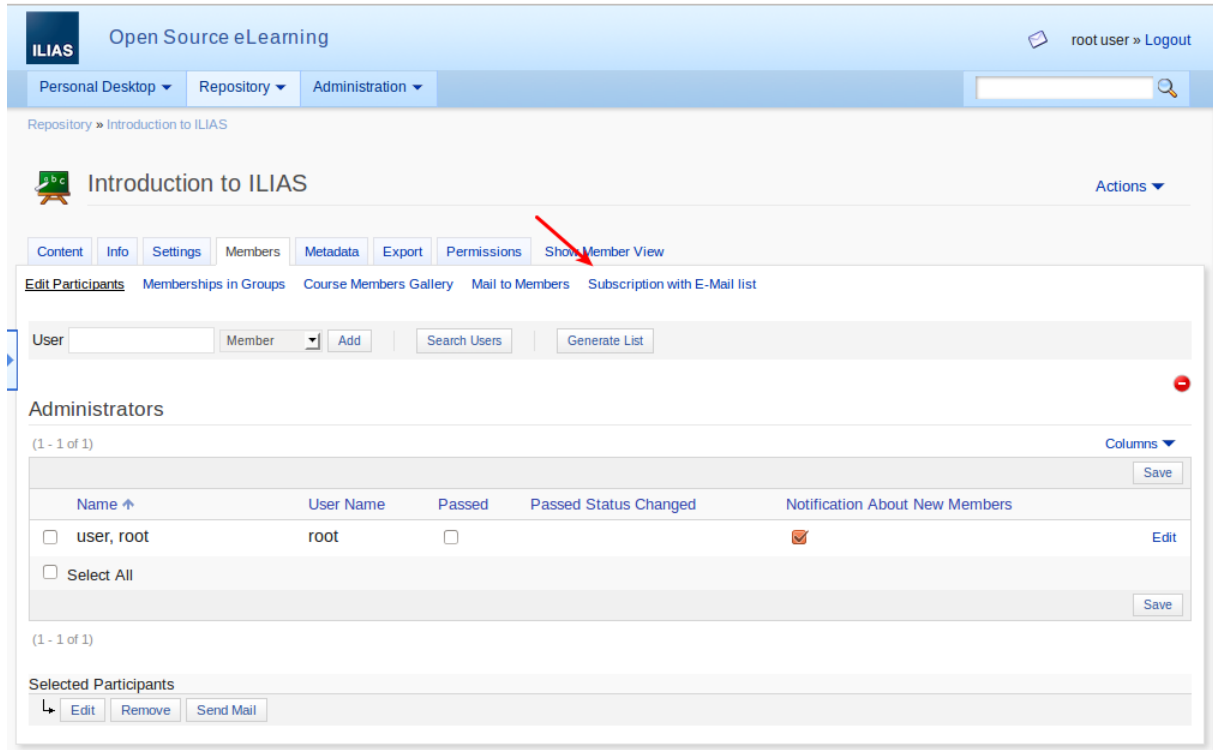

The E-Mailfunctionality allows the invited user to create a ILIAS-Accounts (if activated).

First- and Lastnames of existings Users can be hidden.

Deactivate the Subscription-Plugin in some Subtrees of the Repository.

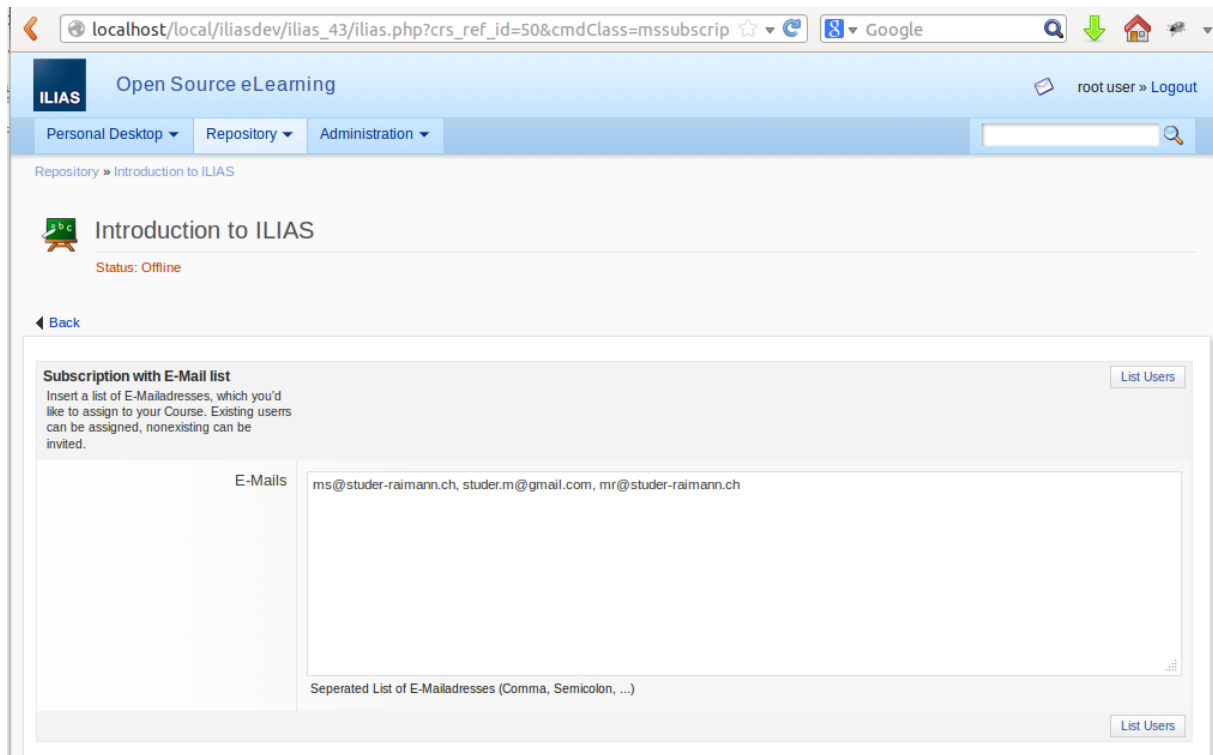

## 4.2 Usage

### 4.2.1 ILIAS Course - Subscription with e-mail list

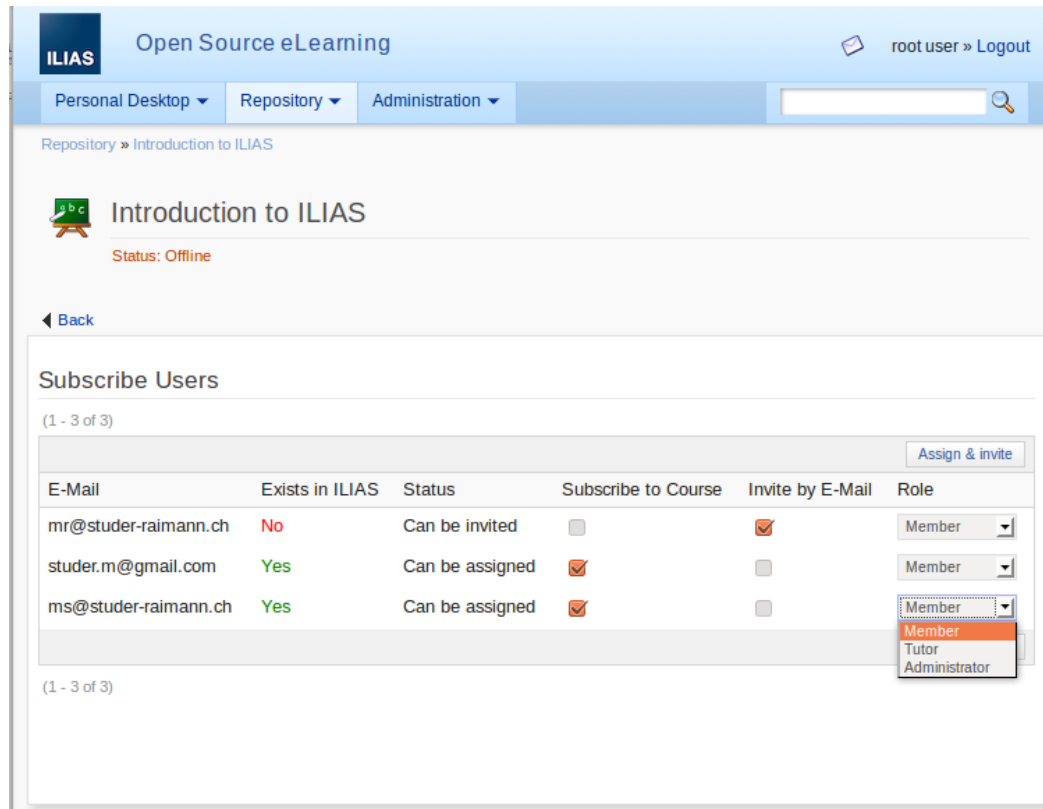

The screenshot shows the ILIAS Administration interface. The top navigation bar includes 'Personal Desktop', 'Repository', and 'Administration'. The 'Repository' section is active, showing 'Introduction to ILIAS'. The 'Members' tab is selected, and the 'Show Member View' link is highlighted with a red arrow. Below this, the 'Edit Participants' section is visible, showing a table of administrators. The table has columns for Name, User Name, Passed, Passed Status Changed, and Notification About New Members. The first row shows 'user, root' with 'root' as the user name and a checked 'Passed' status. The 'Notification About New Members' column has a checked checkbox. The 'Selected Participants' section is also visible, with buttons for 'Edit', 'Remove', and 'Send Mail'.

### 4.2.2 Paste the e-mail addresses of the users you like to assign

The screenshot shows the ILIAS Administration interface with the 'Subscription with E-Mail list' form. The form is titled 'Subscription with E-Mail list' and includes instructions: 'Insert a list of E-Mailaddresses, which you'd like to assign to your Course. Existing users can be assigned, nonexisting can be invited.' The 'E-Mails' field contains the text: 'ms@studer-raimann.ch, studer.m@gmail.com, mr@studer-raimann.ch'. Below the field, there is a label 'Seperated List of E-Mailaddresses (Comma, Semicolon, ...)' and a 'List Users' button.

### 4.2.3 Assign users to the course
